To Whom It May Concern:

It is a pleasure to provide you with this letter of recommendation for Mr. Peter Moon and his company, O2 Compost.

In my present capacity as Solid Waste and Recycling Program Manager for Fort Lewis in Washington State, I have had the opportunity to work with Mr. Moon on a professional basis. As a contractor working for Fort Lewis, Mr. Moon and his company provided excellent project development and management services in the study, development and implementation of a highly successful composting operation at a large-scale military installation.

The Fort Lewis composting operation serves a population of approximately 50,000 people and includes a variety of organic-based wastes such as biosolids, green waste, horse manure, chipped land clearing and storm debris, landscaping debris and food waste. Mr. Moon and his staff successfully coordinated and managed the Fort Lewis waste composition study that was fundamental to determining the feasibility of our composting project. He and his staff also worked closely with Fort Lewis recycling program staff to educate, train, and provide hands on instruction in how to properly operate and maintain a composting facility. Mr. Moon regularly presented his findings and project status reports to Fort Lewis Public Works management staff in a professional, personable and highly competent manner.

Fort Lewis has been operating the permitted composting facility developed by Mr. Moon and O2 Compost for the last three years and has future plans to continue to expand this very successful operation. The Fort Lewis composting operation has received positive recognition and accolades from the Department of the Army's western region installation command. As a result of Fort Lewis' successes the food waste composting component of our program has been selected as a best management practice for 2009 at all installations under the western region installation command.

It is my honor to highly recommend Mr. Peter Moon and O2 Compost to you and your organization for all your compost project needs. The expertise, attention to detail, and follow-up customer service provided by Mr. Moon and his company were excellent and instrumental to the success of our program. Please contact me directly if you have any further questions or if I may provide any additional information regarding this recommendation. Thank you.

Respectfully,

A handwritten signature in black ink that reads "Ron Norton". The signature is written in a cursive, flowing style.
